WILD FLOWER SEEDS FOR SALE

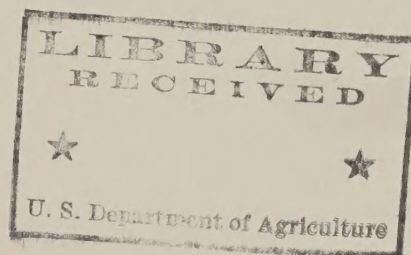

1942

An aid to conservation of native flora

Read carefully

Sow seeds in October into December or early spring. Some of these seeds have never been on sale before. There is no 100% germination of any seed. It is not alone the rarity of certain species but the great difficulty of collecting which regulates the price. All seeds packets 15cts. except a few otherwise priced. Give additional names for second choice and add .03 cts. for postage. Please return list if possible. Garden herb seeds for sale also.
